

BAMWISE

Soundproof

Bamwise is a 6-piece band from Zagreb, Croatia and was formed in 2007. Collaboration between five musicians and a VJ brought together by mutual appreciation and love for electronically fueled dub music.

They combine synths, drums, bass, guitar, vocals, an array of sound effects and impressive visuals. The idea behind it all is to inspire people to think, listen and act responsibly in their lives.

Soundproof was recorded during 2016 @ Level-Point & Fun House studios in Zagreb, Croatia. Mix and production were handled by the band members **Igor Ivanković** (bass) and **Robert Martinović** (live mix/sound engineer). Mastering was done by a world renown techno producer/DJ **Petar Dundov** @ Neumatik Studio. Artwork and visual aspect are the work of **Marijana Krbot**, also a member of the band.

Through 8 songs in total, the band takes us on a dub journey in their own scenario, seriously fueled by electronic arrangements, using synthetic as well as acoustic elements to create an organic yet powerful sound, emphasizing drums and bass as basic elements of the original dub reggae aesthetics. Even though their musical approach is inspired by Jamaican dub and reggae musicians, their sound is fresh with a combination of various elements which include modern fluctuations of electronic genres and trends in English and French dub production. This allows them to have their own take on underground bass music.
