
ŠUMOVI PROTIV VALOVA

Šumovi protiv valova

Šumovi protiv valova are a group that performs own music with a lot of musicality, temperament, discipline and passion in its' creation and love. They are a group of individuals with different minds, but acting as a whole when creating together. After almost a decade of playing together, and precisioning the alchemy of dynamics, musical ideology and language the band decided it is a right time for a first self-titled full-length LP to be unleashed upon the world. Line-up of the band remains the same and unchanged from its initial formation.

A quartet in a classical rock role-playing made of drums, bass, guitar and keyboards - **Jerko Jurin, Ivan Čadež, Hrvoje Radnić i Hrvoje Nikšić.**

For about nine years now Šumovi protiv valova have been bringing joy to other people's lives with their own vision of ambient psychedelic rock instrumentals. Throughout this time they recorded music sporadically which depended on the tracks being in the final stage of performing them flawlessly. The self-titled full length has been recorded live, without repetition or overdubs. The idea was to achieve a pure musical mirror or sound photography of the band as it is. A huge factor was the approach to the recording and mixing process of the material. The band decided for an **AAA** or triple analog technology. Meaning during the process no computer was used whatsoever. The entire recorded material was put to tape and then directly cut for vinyl. There is no mastering present as well.

artist

Šumovi protiv valova

Jerko, Hrvoje, Ivan, Hrvoje

title

Šumovi protiv valova
